DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to device for wet treating a flat plate-like substrate.

Group II, claim(s) 7-8, drawn to method of controlling the gas flow within a device.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature between claims 1 and 7 is at least two exhaust levels for separately collecting gas from the interior of the liquid collector. DE 198 07 460 teaches at least two exhaust levels (Fig.2, #6 and #8) for separately collecting gas from the interior of the liquid collector. Since the common technical feature is known in the art, claims 1 and 7 lacks unity of invention a posteriori.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
